MEMORANDUM FOR: Supergrade Review Board

SUBJECT : Encumbered Supergrade Positions

REFERENCE : Memo dtd 9 Mar 53 for DCI thru DD/A fr Supergrade Review Board, subject: "Recommendation of Review Board"

1. In the second paragraph of the referenced memorandum, the Board notes, "Approval of this action will bring the total number of supergrade positions to ☐. However, because a number of such positions are vacant or still unencumbered by personnel holding supergrade classifications, this action would not result in exceeding the ceiling of ☐ with respect to personnel actually classified at supergrade levels."

25X9

25X9

2. Although this and similar actions have not, as yet, exceeded the ceiling of ☐ it is urged that consideration be given to the possibility that such actions may so increase the number of individuals on duty at supergrade levels as to prevent either the conversion of certain active duty military personnel presently occupying supergrade positions to supergrade civilian employment or to prevent the promotion of individuals presently graded at GS-15 to the supergrade of the position they presently occupy.

25X9

3. It is suggested that in the future memoranda making recommendations of this nature reflect also the number of supergrade positions presently encumbered by either active duty military personnel or lower graded civilians.
